Ref.No. Mgt.Sci/2024-25/274

Date: - 24/10/2024

To,  
The Deputy Registrar,  
Academic Section  
Dr. Babasaheb Ambedkar Marathwada University,  
Chhatrapati Sambhajinagar.

**Subject: - Regarding Submission of Syllabus of BCA Honours (Four  
Year) Course as per NEP -2020.**

Sir,

With reference to the above cited subject, I am to inform you that as per the meeting of  
Departmental committee, I am herewith submitting the Course Structure of the BCA Honours  
Programme as per NEP -2020.

In this regards, please make a necessary provision in University Examination Software for  
above mentioned course. Further, we would like to implement the syllabus for the batch of BCA  
Honours for the academic year 2024-2025.

This is for your information and further necessary action.

Thanking you,

Dr. Mohd. Farooque Khan  
Director

|                         |  | <b>Semester Examination</b>    | <b>30</b>     |

**Course Objectives**

The objectives of the course are to enhance the ability of the students in Object Oriented Programming and practice the object-oriented programming concepts and techniques, practice the use of C++ classes and Objects. Smooth handling of Multiple and Multilevel Inheritance. Understanding of dynamic binding, use of Inline and Friend Functions, Polymorphism, and file I/O streams.

|           |   |
|-----------|---|
| <b>1)</b> | To enhance the advance concepts of Object Oriented Programming                          |
| <b>2)</b> | To provide the knowledge of classes and Object for Data hiding                          |
| <b>3)</b> | To understand importance of various functions and their uses                            |
| <b>4)</b> | To develop skills to apply appropriate uses of Inheritance, exception and file handling |

| <b>Pre Requisite</b> | <b>Basic knowledge of C programming</b>  | <b>Number of Lecture</b> |
|----------------------|--|--------------------------|
| <b>Unit – I</b>      | <b>Principles of Object Oriented Programming (OOP):</b> Introduction to OOP, Difference between OOP and Procedure Oriented Programming; Concepts: Object, Class, Encapsulation, Abstraction, Polymorphism and Inheritance, Applications of OOP. Special operators: scope resolution operator, Member Dereferencing operators, Memory management operators, Manipulators and Type cast operator | <b>10</b>                |
| <b>Unit – II</b>     | <b>Structure of a C++ Program and Classes and Objects :</b> Class Declaration : Data   | <b>10</b>                |

|                                   |  |           |
|-----------------------------------|--|-----------|
|                                   | Members, Member Functions, Private and Public members, Creating Objects, Accessing class data members, Accessing member functions; Class Function Definition: Member Function definition inside the class declaration and outside the class declaration.   |           |
| <b>Unit – III</b>                 | <b>Functions:</b> Friend function, inline function, Static members, Function Overloading, Arrays within a class. Arrays of Objects; Objects as function arguments: Pass by value, Pass by reference, Pointers to Objects. Constructors: Declaration and Definition, Types of Constructors, (Default, Parameterized, Copy Constructors). Destructors: Definition and use. Operator Overloading & Type Conversion: Conversion from basic type to user defined type, User defined to basic type and one user defined conversion to another user defined type.   | <b>10</b> |
| <b>Unit – IV</b>                  | <b>Inheritance:</b> Extending Classes Concept of inheritance, Base class, Defining derived classes, Visibility modes : Public, Private, Protected ; <b>Types of Inheritance:</b> Single inheritance : Privately derived, Publicly derived; Making a protected member inheritable, multilevel inheritance, multiple Inheritance and ambiguity of multiple inheritance, Hierachal Inheritance, Hybrid, Nesting of classes. <b>Polymorphism:</b> Definition, Application and demonstration of Data Abstraction, Encapsulation and Polymorphism. Early Binding, Polymorphism with pointers, Virtual Functions, Late binding, pure virtual functions. | <b>08</b> |
| <b>Unit – V</b>                   | <b>Exception Handling:</b> Definition, Exception Handling Mechanism : Throwing mechanism and Catching Mechanism, Rethrowing an Exception<br><b>File Processing :</b> Opening and closing of file, Binary file operations, structures and file operations, classes and file operations, Random file processing.   | <b>07</b> |
|                                   | <b>Total Lectures</b>  | <b>45</b> |

### **Course Outcomes**

|    |  |
|----|--|
| 1) | Ability to develop applications for a range of problems using object-oriented programming techniques |
| 2) | Enhancing Programming Skill by using Object, Classes and functions.                                  |
| 3) | Understanding Single, multiple and Multi level Inheritance and creating real events.                 |
| 4) | To develop real life Applications by extracting deep level of C++.                                   |

| <b>Pre Requisite</b> | <b>Basic knowledge of C programming</b>   | <b>Number of Lecture</b> |
|----------------------|---|--------------------------|
|                      | <ol style="list-style-type: none"> <li>WAP program in C++ which will display the book information which include the following: a) Title of the book b) Author name c) publisher name d) edition 5) price</li> <li>WAP program in C++ to swap two numbers using Call by Value Call by Reference.</li> <li>WAP program in C++ to demonstrate switch statement.</li> <li>WAP program in C++ to convert binary number to decimal number</li> <li>WAP program in C++ to print multiplication table of a given number.</li> <li>WAP program in C++ to find prime numbers up to n values (n must be user defined).</li> <li>WAP program in C++ to find factorial of a given number.</li> <li>WAP program in C++ to find addition of two given numbers using inline function</li> <li>WAP program in C++ to find Max and Min of two given numbers using inline functions.</li> <li>WAP program in C++ to illustrate use of friend functions.</li> <li>WAP program in C++ to illustrate use of virtual functions.</li> <li>WAP program in C++ to illustrate use of exception handling.</li> <li>WAP program in C++ to declare a class. Declare pointer to class. Initialize and display the contents of the class member</li> <li>WAP program in C++ to create an EMPLOYEE class contains following members: data members: Employee number, Employee name, Basic, DA, IT, Net Salary and print data members</li> <li>WAP program in C++ to create single level inheritance.</li> </ol> |                          |

### Course Objectives

|    |   |
|----|---|
| 1) | To equip students with the skills to create, modify, and manage database structures using DDL commands, ensuring proper data organization and integrity within relational databases.                                      |
| 2) | To develop the ability to perform basic data manipulation operations, including inserting, updating, deleting, and retrieving data from databases using DML commands.   |
| 3) | To enhance students' ability to perform complex data retrieval operations using advanced SQL features such as joins, subqueries, aggregate functions, and set operations, enabling efficient data analysis and reporting. |
| 4) | To provide an understanding of transaction control mechanisms, ensuring data consistency and integrity, and to introduce basic security measures for managing database access and permissions.                            |

|               |    |                        |
|---------------|----|------------------------|
| Pre Requisite | NA | Number of Lecture - 45 |
|---------------|----|------------------------|

### LAB Assignment

- **Creating Databases and Tables:**
  - SQL commands: CREATE DATABASE, CREATE TABLE
  - Specifying data types and constraints
  - Primary keys, foreign keys, and indexes
- **Altering and Dropping:**
  - ALTER TABLE statement (adding, modifying, and deleting columns)
  - DROP TABLE and DROP DATABASE commands
- **Constraints and Integrity:**
  - NOT NULL, UNIQUE, PRIMARY KEY, FOREIGN KEY, CHECK constraints

- Enforcing data integrity
- **Basic DML Operations:**
  - INSERT INTO statement for adding data
  - UPDATE statement for modifying data
  - DELETE statement for removing data
- **Retrieving Data with SELECT:**
  - Basic SELECT statement
  - Using WHERE clause for filtering
  - ORDER BY clause for sorting results
  - LIMIT and OFFSET for pagination

## Discipline Specific Core-(Minor) M2

|                  |            |                         |       |
|------------------|------------|-------------------------|-------|
| Subject Title    | Statistics |                         |       |
| Subject Ref. No. | BCA305T    | No. of Credits          | 2     |
|                  |            | No. of Periods / Week   | 45 /3 |
|                  |            | Assignments / Sessional | 20    |
|                  |            | Semester Examination    | 30    |

### Course Objectives

|    |   |
|----|---|
| 1) | To demonstrate knowledge of various statistical data analysis tools.  |
| 2) | To demonstrate knowledge of statistical investigation, classification, tabulation, diagrammatic and graphic presentation of data. |
| 3) | To demonstrate the ability to calculate measures of location and measures of dispersion grouped and ungrouped data cases.         |
| 4) | To demonstrate the ability to perform complex data management and analysis.   |

### Course Outcomes (COs)

At the end of the course, students will be able to:

|      |   |
|------|---|
| CO-1 | Describe and discuss the key terminology, concepts tools and techniques used in statistics. |
| CO-2 | Critically evaluate the underlying assumptions of analysis tools.                           |
| CO-3 | Understand and critically discuss the issues surrounding sampling and significance.         |
| CO-4 | Conduct basic statistical analysis of data.   |

| Pre-Requisite | Basic knowledge of Mathematics and Algebra  | Number of Lecture |
|---------------|---|-------------------|
| Unit – I      | <b>Introduction to statistics</b><br>Definition, features, functions, importance and limitations.   | 5                 |
| Unit – II     | <b>Statistical investigation</b><br>Concept, planning, types of enquiry, collection of data, drafting the questionnaire, sources of secondary data, editing primary and secondary data.<br><b>Sampling and sample designs</b><br>Introduction, census and sample method, theoretical basis of sampling, | 10                |

|                                   |  |           |
|-----------------------------------|--|-----------|
|                                   | methods of sampling, size of the sample, sampling and non-sampling errors.   |           |
| <b>Unit – III</b>                 | <p><b>Classification and tabulation of data</b><br/>           Meaning, objective, types of classification, formation of various frequency distribution, tabulation of data, role of tabulation, parts of table, general rules of tabulation.</p> <p><b>Diagrammatic and graphic presentation of data</b><br/>           Significance of diagrams and graphs, rules of constructing diagrams, types of diagrams, graphs, graphs of frequency distribution.</p> | <b>10</b> |
| <b>Unit – IV</b>                  | <p><b>Measures of central tendency and measures of dispersion</b><br/>           Definition, essentials of a good average, types of averages i.e. mean ,median and mode, relation between mean ,median and mode. Measures of dispersion i.e. range, quartile deviation, mean deviation, standard deviation for grouped and ungrouped data and also coefficient of variation.</p>   | <b>10</b> |
| <b>Unit – V</b>                   | <p><b>Correlation analysis and Regression analysis</b><br/>           Definition , significance of study of correlation, types, Karl-person's coefficient of correlation, interpreting coefficient of correlation, definition of regression ,uses of regression analysis, two regression equations, simple problems only</p>   | <b>10</b> |
|                                   | <b>Total Lectures</b>  | <b>45</b> |
| <b>Text Books</b>                 | <ol style="list-style-type: none"> <li>1. S. P . Gupta," Statistical Methods"<br/>           S. . Chand and Sons, New Delhi, 2008</li> <li>2. S.C. Gupta , "Fundamental of Statistics" Himalaya Publishing House, New Delhi, 2004.</li> <li>3. Sharmar J.K. "Business Statistics" Pearson Education, 2007.</li> </ol>  |           |
| <b>Additional Reference Books</b> | <ol style="list-style-type: none"> <li>1. S.C. Gupta &amp; Indra Gupta " Business Statistics" Himalaya Publishing House, 2012.</li> <li>2. C. Satyadevi, "Quantitative Techniques" S. Chand &amp; Company Ltd, 2009.</li> <li>3. Arora. P.N. Arora, Sumeet &amp;Arora Amit "Managerial Statistics " S. Chand &amp; Sons , 2009.</li> </ol>   |           |

|                         |  |                                |       |
|-------------------------|--|--------------------------------|-------|
| <b>Subject Title</b>    | <b>Mathematics (Numerical Methods)</b> |                                |       |
| <b>Subject Ref. No.</b> | BCA306T                                | <b>No. of Credits</b>          | 2     |
|                         |  | <b>No. of Periods / Week</b>   | 45 /3 |
|                         |  | <b>Assignments / Sessional</b> | 20    |
|                         |  | <b>Semester Examination</b>    | 30    |

### Course Objectives

|    |   |
|----|---|
| 1) | To understand the importance of error analysis and their propagation.   |
| 2) | To introduce the basic concepts of solving algebraic, transcendental equation and system of non-linear equations. |
| 3) | To understand techniques of interpolation and polynomial fitting.   |
| 4) | To understand methods of numerical differentiation, integration and solution of ordinary differential equations.  |

### Course Outcomes (COs)

At the end of the course, students will be able to:

|             |   |
|-------------|---|
| <b>CO-1</b> | Calculate errors induced in the values by truncation of a series expansion.         |
| <b>CO-2</b> | Find roots of linear and non-linear system (algebraic and transcendental) equations |
| <b>CO-3</b> | Fit polynomial to a given set of data points.                                       |
| <b>CO-4</b> | Solve differential and integral equations numerically.                              |

| <b>Pre-Requisite</b> | <b>Number of Lecture</b>  |    |
|----------------------|---|----|
| <b>Unit – I</b>      | Basic knowledge of Mathematics and Algebra<br><br>Numbers and their accuracy.<br>Errors and their computations -Absolute, Relative and percentage.<br>Solution of Non-linear and transcendental equations Bisection method, method of False position and Newton-Raphson method. | 7  |
| <b>Unit – II</b>     | Solution of linear simultaneous equations. Gauss-Elimination method, Gauss-Jordan method and Gauss-Seidal iterative method.   | 8  |
| <b>Unit – III</b>    | Interpolation. Lagrange's interpolation, Finite difference, Forward, Backward and Central, Newton's formulae for Forward, Backward and Central interpolation  | 10 |

|                                   |   |    |
|-----------------------------------|---|----|
| <b>Unit – IV</b>                  | Regression Analysis, Linear regression, polynomial regression. Fitting an exponential curve and Hyperbolic regression   | 8  |
| <b>Unit – V</b>                   | Numerical differentiation and integration, derivative using Newton's forward and backward difference formulae , Stirling formula ,Numerical integration-Trapezoidal rule, Simpson's 1/3rule ,Simpson's 3/8 rule ,Numerical solution of ordinary differential equations, solution by Taylor's series ,Euler's method, modified Euler's method ,Runge-Kutta method of 2 <sup>nd</sup> and 4 <sup>th</sup> order | 12 |
| <b>Text Books</b>                 | <ol style="list-style-type: none"> <li>1. V. Rajaraman "Computer oriented numerical methods" (third edition)1993</li> <li>2. S. S. Shastri "Introductory methods of numerical analysis" Vol-2 PHI, second edition</li> </ol>  |    |

|                         |                                |                                |              |
|-------------------------|--------------------------------|--------------------------------|--------------|
| <b>Subject Title</b>    | <b>[A] Computer Networking</b> |                                |              |
| <b>Subject Ref. No.</b> | <b>BCA 307T</b>                | <b>No. of Credits</b>          | <b>2</b>     |
|                         |                                | <b>No. of theory/ per Week</b> | <b>45/03</b> |
|                         |                                | <b>Assignments / Sessional</b> | <b>20</b>    |
|                         |                                | <b>Semester Examination</b>    | <b>30</b>    |

**Course Objectives**

- 1) To understand the concept of Computer network
- 2) To impart knowledge about networking and internet working devices
- 3) To understand the different transmission media & Network Topology
- 4) To understand the concept of modulation & Multiplexing Technique

**Course Outcomes (COs)**

|             |  |
|-------------|--|
| <b>CO-1</b> | <b>Design &amp; Implement of computer network.</b> |
| <b>CO-2</b> | Configure wire & wireless Network.                 |
| <b>CO-3</b> | Implement TCP/IP Protocols.                        |
| <b>CO-4</b> | Installation of different Operating System.        |

|                 |  | <b>Number<br/>of<br/>Lecture</b> |
|-----------------|--|----------------------------------|
| <b>Unit – I</b> | <b>Introduction,</b><br>Data Communication, components, Computer network Advantage and applications, simplex, half-duplex, and full-duplex, Types of connections: point-to-point and multipoint, topology, Categories of Networks LAN , MAN & WAN, Analog and Digital Data, Transmission Modes, Parallel Transmission, serial Transmission , Asynchronous & Asynchronous serial Transmission | <b>15</b>                        |

|                                   |   |           |
|-----------------------------------|---|-----------|
|                                   | <p><b>Reference models:</b><br/>TCP/IP Protocol Suite: The OSI Model</p> <p><b>Connecting devices</b><br/>Hub, Repeaters, Bridges, switches &amp; Routers, Media Access Control (MAC), Standard Ethernet,</p>   |           |
| <b>Unit – II</b>                  | <p><b>Transmission Media</b><br/>Guided media include twisted-pair cable, coaxial cable, and fiber-optic cable. Unguided medium, Radio Waves, Microwaves &amp; Infrared waves.</p> <p><b>Switching Networks</b><br/>Circuit-switched networks, packet-switched networks, and message-switched networks.</p> <p><b>Multiplexing</b><br/>Frequency-Division Multiplexing, Wavelength-Division Multiplexing, Synchronous Time-Division Multiplexing,</p>   | <b>15</b> |
| <b>Unit – III</b>                 | <p><b>Analog-To-Analog Conversion</b><br/>Concept of modulation and demodulation, Amplitude modulation (AM), frequency modulation (FM), and phase modulation (PM)</p> <p><b>Digital-To-Analog Conversion</b><br/>Amplitude shift keying (ASK), frequency shift keying (FSK), and phase shift keying (PSK), quadrature amplitude modulation (QAM)</p> <p><b>Analog-To-Digital Conversion</b><br/>Pulse Code Modulation (PCM), Delta Modulation (DM),</p> | <b>15</b> |
|                                   | <b>Total Marks</b>  | <b>45</b> |

|                         |                            | <b>Semester Examination</b>              | <b>30</b>    |

### **Course Objectives**

- 1) Understand the difference between a Microprocessor and a Microcontroller
- 2) Familiarize the basic architecture of 8051 microcontroller.
- 3) Program 8051 microprocessor using Assembly Level Language and C.
- 4) Understand the interrupt system of 8051 and the use of interrupts.

### **Course Outcomes (COs)**

|             |   |
|-------------|---|
| <b>CO-1</b> | Understand difference between microprocessor & Microcontroller                    |
| <b>CO-2</b> | Describe architecture and operation of Microcontroller 8051 & 8085 Microprocessor |
| <b>CO-3</b> | Able to apply the fundamentals of assembly level programming of microcontroller   |
| <b>CO-4</b> | Able to understand the 8051 interrupt concepts                                    |

|                  |  | <b>Number<br/>of<br/>Lecture</b> |
|------------------|--|----------------------------------|
| <b>Unit – I</b>  | <b>Fundamentals of Microprocessor:</b><br>Compare microprocessor and microcontroller, Architecture of 8085 microprocessor, Pin details and functional operation of 8085, Memory and I/O interfacing, Basics of Programming.  | <b>15</b>                        |
| <b>Unit – II</b> | <b>Introduction to 8051 Architecture:</b><br>The 8051 Architecture- Hardware- Oscillator and clock-program counter data pointer-registers-stack and stack pointer-special function registers- memory organization-program memory-data memory Input / Output Ports External memory counter and timer-serial data Input / output- Interrupts | <b>15</b>                        |

|                                   |  |           |
|-----------------------------------|--|-----------|
| <b>Unit – III</b>                 | <b>8051 Programming in Assembly Language:</b><br>Basics of 8051 Assembly Language Programming-Structure of Assembly language-Assembling and running an 8051 program- Moving Data, Different Addressing modes-Accessing memory using various addressing modes- Arithmetic operations and Programs-Logical operations and Programs -Branching - I/O Port Programs – bit level instructions and Programs –Timer and counters - and application Programs, Interrupt programming, 8051 programming in ‘C’ | <b>15</b> |
|                                   | <b>Total Marks</b>   | <b>45</b> |
| <b>Text Books</b>                 | 1) Microprocessor Architecture: Programming and Applications with the 8085, Penram International Publishing by R. S. Gaonkar<br>2) The 8051 Microcontrollers and Embedded Systems by Muhammed Ali Mazidi<br>3) Microcontrollers [ Theory and Applications] – Ajay Deshmukh, TMH, New Delhi, 2009   |           |

|                  | Assignments / Sessional          | 20             |   |
|                  | Semester Examination             | 30             |   |

### Course Objectives

- 1) Familiarize the hardware components of the computer system.
- 2) Assemble and disassemble a computer system.
- 3) Install and configure various expansion cards, peripherals, BIOS, operating system and device drivers
- 4) Provide skill in troubleshooting computers and the peripherals

### Course Outcomes (COs)

|      |  |
|------|--|
| CO-1 | Identify and describe the functions of essential computer components:  |
| CO-2 | Assemble and repair Desktop Computer with all its hardware components, <b>Troubleshoot common computer hardware problems</b>                     |
| CO-3 | Install different Operating System and all other application software, Customize Operating System and maintenance of system application software |
| CO-4 | Install Printer, Scanner and troubleshoot their faults.  |

|          |  | Number<br>of<br>Lecture |

- 1) Installation of different types of OS Win 7/8/10/11,
- 2) Study of different types of Network cables and practically implement the cross-wired cable & straight through cable using clamping tool.
- 3) Connect the computers in Local Area Network (Wired Network)
- 4) Sharing of Hardware resources in the network
- 5) Study of different Networking Devices in Detail
- 6) Configure wireless Router & create the wireless network
- 7) Study of IP address & implement in network using different classes
- 8) Study of basic network command and Network configuration commands.
- 9) Installation and introduction of simulation tools packet tracer
- 10) Remote Desktop Connection

|                         |                                | <b>Total Practical Hours / per Week</b> | <b>45/03</b> |
|                         |                                | <b>Assignments / Sessional</b>          | <b>20</b>    |
|                         |                                | <b>Semester Examination</b>             | <b>30</b>    |

- 1) WRITE AN ALP TO TRANSFER A BLOCK OF DATA BYTES FROM SOURCE MEMORY TO DESTINATION MEMORY USING 8051
- 2) WRITE AN ALP TO EXCHANGE TWO BLOCKS OF DATA BYTES USING 8051
- 3) WRITE AN ALP TO FIND THE SMALLEST ELEMENT IN AN ARRAY USING 8051
- 4) WRITE AN ALP TO FIND THE LARGEST ELEMENT IN AN ARRAY USING 8051
- 5) WRITE AN ALP TO ARRANGE N 8-BIT NUMBERS IN ASCENDING ORDER.
- 6) WRITE AN ALP TO ARRANGE N 8-BIT NUMBERS IN DESCENDING ORDER.
- 7) WRITE AN ALP TO PERFORM ADDITION OF NUMBER
- 8) WRITE AN ALP TO PERFORM SUBTRACTION OF NUMBER
- 9) WRITE AN ALP TO PERFORM MULTIPLICATION OF NUMBER
- 10) EXAMPLES FOR LOGICAL BYTE OPERATIONS

|                         |                                  | <b>Total Practical Hours / per Week</b> | <b>45/03</b> |
|                         |                                  | <b>Assignments / Sessional</b>          | <b>20</b>    |
|                         |                                  | <b>Semester Examination</b>             | <b>30</b>    |

- 1) Identification of different Components of a computer and demonstration and uses of them & study different Tools/equipment used for assembling/disassembling a PC.
- 2) Demonstration of BIOS/CMOS setup, POST in a Computer step by step & Demonstration of different types of configurations and effect of changes in an existing BIOS of a system
- 3) Installation of different types of OS Win 7/8/10/11, Demonstration on Windows Using: Safe Mode, Safe Mode Boot options, Last Known Good Configuration, etc.
- 4) Demonstrating Windows Diagnostic Tools, System Restore, Creating Restore point, restore using Restore point, etc. & Installation of different device driver for the system.
- 5) Installation & Uninstalling of different application software & Antivirus.
- 6) Demonstrating computer management in Windows using Disk manager, Shrink, Extend & Creating Logical Drive etc. Creating users, groups etc.
- 7) Demonstrate fixing System case / Cabinet – fixing IO templates, setting cooling fans, fixing Motherboard , CPU & Heat sink assembly, Fixing RAM modules, Adding HDD/DVD, FDD, SMPS – power connection to various components - motherboard, drives, Add-on card, cooling fans, etc.
- 8) Assembling and Disassembling of Laptop to identify the parts and to install OS and configure it.
- 9) Install and Configure Dual OS Installation
- 10) Identify problems using BIOS beep codes and error codes, troubleshooting SMPS, Processor, Motherboard components, RAM, Expansion cards, drives etc.

|                         |                        | <b>Semester Examination</b>    | 30     |

#### Course Objectives

|    |  |
|----|--|
| 1) | Write code using JavaScript with HTML.               |
| 2) | Write program for form validation.                   |
| 3) | Write basic scripts to perform different operations. |
| 4) | Write program using HTML+CSS+Javascript.             |

|                       |   |                               |
|-----------------------|---|-------------------------------|
| <b>Pre Requisite</b>  | Basic knowledge of HTML tags and CSS.   | <b>Number of Lecture - 45</b> |
| <b>Lab Assignment</b> |   |                               |
| 1.                    | Write javascript code to demonstrate use of <ul style="list-style-type: none"> <li>a. For loop</li> <li>b. If condition</li> <li>c. Nested if</li> <li>d. While loop</li> <li>e. For each loop</li> <li>f. Switch statement</li> <li>g. Alert box</li> <li>h. Prompt box</li> <li>i. Document.write functions</li> <li>j. User defined functions</li> <li>k. Variables</li> <li>l. Constants</li> <li>m. Ternary operators</li> <li>n. Increment ++</li> <li>o. Decrement – operators</li> <li>p. Arithmetic operators</li> <li>q. Comparision operators</li> </ul> |                               |
| 2.                    | Write a JavaScript code that will display different images as per selection of user selection. (Use radio buttons).   |                               |
| 3.                    | Write JavaScript code that will accept two numbers from user & on click of buttons (add, mul, sub, div) display appropriate result in the third textbox.  |                               |

4. Write JavaScript code that will make sure that user must enter values in all the fields if user fails to do so then display appropriate error message to user. (Take suitable fields for Registration form – cover all the elements)
5. Write JavaScript code that will place textbox & drop down box on webpage , accept input from textbox & accept a digit from 1-10 from drop-down as per selection display alert message as many times as value selected from dropdown box & message will be the input of the textbox.
6. write a HTML code that will display a textbox & a drop down box , accept the string from user in textbox & a number (1-9)from drop down box , display the string as many times as the number selected by user on webpage. (using **JavaScript**)
7. Write an HTML code that will accept numbers from user until user enters 0 from prompt box & display the message “You have entered...number...” On the webpage for every number. (using **JavaScript**)
8. Write a program using **HTML 5** that will use number, email, range, date.
9. Write a HTML code that will display a textbox on webpage to accept a name of student. Using **JavaScript** make sure that only alphabets should be accepted. (**use regular expressions**)
10. Write a HTML code that will display a textbox on webpage to accept an age of student. Using **JavaScript** make sure that only numeric value should be accepted. (**use regular expressions**)
11. Write a HTML code that will display a textarea on webpage to accept address of student. Using **JavaScript** make sure that only alphanumeric value should be accepted. (**use regular expressions**)
12. Write a HTML code that will display a textarea on webpage to accept a paragraph from user. Using **JavaScript** display the total count of words present in the paragraph.
13. Write a HTML code that will display a textarea on webpage to accept a paragraph from user. Using **JavaScript** display the total count of word ‘sachin’ present in the paragraph.
14. Write a HTML code that will display a textarea on webpage to accept a paragraph from user. Using **JavaScript** replace the every occurrences of word ‘sachin’ with ‘ramesh’ present in the paragraph.
15. Write a HTML code that will display a textarea on webpage to accept a paragraph from user. On click of button Using **JavaScript** display first 5 and last 5 word with red color , times new roman font , size – 24 using embedded stylesheet.
16. Write a HTML code that will display a textarea on webpage to accept a paragraph from user. On click of button Using **JavaScript** display first 5 word with red color , times new roman font , size – 24 using external stylesheet on webpage

### Course Objectives

|    |  |
|----|--|
| 1) | To equip students with the skills to create, modify, and manage database structures using DDL commands, ensuring proper data organization and integrity within relational databases. |
| 2) | Apply the Conceptual Design Model and Database Hierarchical Structure to construct the real-world requirement.   |
| 3) | Analyze the various constraints and functions to populate the database & implement different working concept of DBMS through SQL Queries.  |
| 4) | Present the result of database creation and querying process, document it.   |

|               |                                    |                        |
|---------------|------------------------------------|------------------------|
| Pre Requisite | Basic Knowledge of DBMS and Oracle | Number of Lecture - 45 |
|---------------|------------------------------------|------------------------|

### Lab Assignment

#### Assignment 1.

Consider the following schema for a Library Database:

BOOK(Book\_id, Title, Publisher\_Name, Pub\_Year)

BOOK\_AUTHORS(Book\_id, Author\_Name) PUBLISHER(Name, Address, Phone)

BOOK\_COPIES(Book\_id, Programme\_id, No-of\_Copies)

BOOK\_LENDING(Book\_id, Programme\_id, Card\_No, Date\_Out, Due\_Date)

LIBRARY\_PROGRAMME(Programme\_id, Programme\_Name, Address)

Write SQL queries to

1. Retrieve details of all books in the library – id, title, name of publisher, authors, number of copies in each Programme, etc.
2. Get the particulars of borrowers who have borrowed more than 3 books, but from Jan 2017 to Jun 2017.
3. Delete a book in BOOK table. Update the contents of other tables to reflect this data manipulation operation.
4. Partition the BOOK table based on year of publication. Demonstrate its working with a simple query.
5. Create a view of all books and its number of copies that are currently available in the Library.

**Assignment 2.**

Consider the schema for College Database:

STUDENT(USN, SName, Address, Phone, Gender)

SEMSEC(SSID, Sem, Sec)

CLASS(USN, SSID)

COURSE(Subcode, Title, Sem, Credits)

IAMARKS(USN, Subcode, SSID, Test1, Test2, Test3, FinallA)

Write SQL queries to

1. List all the student details studying in fourth semester 'C' section.
2. Compute the total number of male and female students in each semester and in each section.
3. Create a view of Test1 marks of student USN '1BI15CS101' in all Courses.
4. Calculate the FinallA (average of best two test marks) and update the corresponding table for all students.
5. Categorize students based on the following criterion: If FinallA = 17 to 20 then CAT = 'Outstanding' If FinallA = 12 to 16 then CAT = 'Average' If FinallA < 12 then CAT = 'Weak'

**Assignment 3.**

Consider the schema for Company Database:

EMPLOYEE(SSN, Name, Address, Sex, Salary, SuperSSN, DNo)

DEPARTMENT(DNo, DName, MgrSSN, MgrStartDate)

DLOCATION(DNo, DLoc) PROJECT(PNo, PName, PLocation, DNo)

WORKS\_ON(SSN, PNo, Hours)

Write SQL queries to

1. Make a list of all project numbers for projects that involve an employee whose last name is 'Patil', either as a worker or as a manager of the department that controls the project.
2. Show the resulting salaries if every employee working on the 'IoT' project is given a 10 percent raise.
3. Find the sum of the salaries of all employees of the 'Accounts' department, as well as the maximum salary, the minimum salary, and the average salary in this department.
4. Retrieve the name of each employee who works on all the projects controlled by department number 5  
(use NOT EXISTS operator).
5. For each department that has more than five employees, retrieve the department number and the number of its employees who are making more than Rs. 6,00,000.

|                         |                                | <b>Semester Examination</b>    | 30     |

### **Course Objectives**

This course includes introduction of skills and practices related to Extensible Markup Language (XML) includes Document Type Definition (DTD), well-formed and valid XML documents, XML schemes, and Extensible Style Language (XSL). XML is designed to meet the challenges of large-scale electronic publishing and is also playing an increasingly important role in the exchange of a wide variety of data on the Web and elsewhere.

|           |   |
|-----------|---|
| <b>1)</b> | Gain a thorough understanding of XML Documents and the XML family of languages and tools. |
| <b>2)</b> | To understand the types of nodes that make up an XML Document. XML Namespaces             |
| <b>3)</b> | To familiar with XML Document Validation, e.g. XML Schema, DTD, XSLT,                     |
| <b>4)</b> | Master the fundamentals of the XPath Language & CSS                                       |

| <b>Pre Requisite</b> | Knowledge of HTML   | <b>Number of Lecture -</b><br><b>45</b> |
|----------------------|---|---|
|                      | <ol style="list-style-type: none"> <li>1. WAP program in XML to display the simple message.</li> <li>2. WAP program in XML to display multiple student records.</li> <li>3. WAP program in XML for DTD.</li> <li>4. WAP program in XML for schema with name Shiporder</li> <li>5. WAP program in XML to show three child attributes and elements.</li> <li>6. WAP program in XML to create complex element employee with Personnel Info.</li> <li>7. WAP program in XML to store information about books and display the file using CSS</li> <li>8. WAP program in XML for creating the XML file that contains the information about five students and displaying the XML file using XSLT.</li> <li>9. WAP in XML to show book description.</li> <li>10. WAP in XML to show introduction of employee.</li> <li>11. WAP in XML by using tree structure for defining organizational structure.</li> <li>12. WAP in XML to show a news using news specification.</li> <li>13. WAP in XML to show today's weather forecast.</li> <li>14. WAP in XML to show menu card description for hotel using different element.</li> </ol> |   |

|                                   |   |                       |

**AEC : Ability Enhancement Course ( Choose any one – Modern Indian Languages )**

|                         |                    |                                |           |
|-------------------------|--------------------|--------------------------------|-----------|
| <b>B Subject Title</b>  | <b>English-III</b> |                                |           |
| <b>Subject Ref. No.</b> | <b>BCA-310T</b>    | <b>No. of Credits</b>          | <b>3</b>  |
|                         |                    | <b>No. of Periods / Week</b>   | <b>3</b>  |
|                         |                    | <b>Total periods</b>           | <b>45</b> |
|                         |                    | <b>Assignments / Sessional</b> | <b>20</b> |
|                         |                    | <b>Semester Examination</b>    | <b>30</b> |

**Course Objectives**

|    |  |
|----|--|
| 1) | To build upon students' Grammatical command on English Language for enhancement of their receptive and productive skills.  |
| 2) | To highlight the importance of proficiency in speaking a language in different domains. To help students differentiate among the various domains on the basis of language.                           |
| 3) | Familiarize learners with the importance of listening skills • Provide an overview of different types of listening skills • Introduce some useful strategies for effective listening                 |
| 4) | To familiarize learners with the importance of listening skills and Make them aware of the importance of reading skills<br>To provide a few strategies to overcome listening errors in communication |

**Course Outcomes (COs)**

At the end of the course, students will be able to:

|             |  |
|-------------|--|
| <b>CO-1</b> | The students are expected to realize their conscious and unconscious mistakes and apply these strategies to know how to be effective listener in their day-to-day life   |
| <b>CO-2</b> | Learners would produce correct sentences both syntactically and grammatically.   |
| <b>CO-3</b> | Upon completion of the course the students are able to identify different types of listening and reading. They can use each listening and reading type based on their need and context.  |
| <b>CO-4</b> | The students would be able to use their applied knowledge in various fields.   |
| <b>CO-5</b> | The Learner's Community would be able to write text in an appropriate style, write Complex reports, letters and present a case with an effective logical structure and review any professional or literary work of art, develop knowledge about computer assisted language learning and its application. |

| Pre Requisite |  | Number of Lectures |
|---------------|--|--------------------|
| Unit – I      | <b>Strategies to Improve Listening Skills</b><br>Introduction, Objectives, Listening Skills, Types of Listening, Importance of Listening, Barriers to Effective Listening, Strategies to improve Listening Skills            | 10                 |
| Unit – II     | <b>Strategies to Improve Reading Skills</b><br>Introduction, Objectives, Reading Skills, Significance of Reading, Types of Reading, Barriers to Effective Reading, Strategies to Improve Reading Skills                      | 10                 |
| Unit – III    | <b>Basic Grammar and its Usage</b><br>Introduction, Objectives, Basic Grammar and its Usage, Parts of Speech, Articles, Tenses, Subject-Verb Agreement, Degree of Comparison, Active and Passive, Direct and Indirect Speech | 10                 |
| Unit – IV     | <b>Speaking Skills in Different Domains</b><br>Introduction, Objectives, Speaking Skills in Different Domains, Personal Domain, Social Domain, Academic Domain, Professional Domain  | 10                 |
| Unit – V      | <b>Concept of Communication</b><br>Introduction, Objectives, Attributes of communication, Process of communication, Feedback   | 05                 |
|               | <i>Total</i>   | 45                 |

### Assignments for Internal Assessment

|  |   |
|--|---|
| 1. Letter Writing<br>2. Writing of formal Application & Email drafting.<br>3. Reading Prose Lesson, Poems, Fiction, Drama<br>4. Seminar Presentations<br>5. Peer Discussions<br>6. Peer interaction based on task/activity<br>7. Appropriate usage of pauses, ellipsis, and Discourse items while speaking.<br>8. Developing Listening Skills<br>9. Listening to audio- lingual aids<br>10. Listening- social, political, historical and scientific speeches<br>11. Power point Presentation not less than 10 slides along with self-introduction. | 15  |
| <b>Total</b>   | 45  |
| <b>Reference books</b>   | 1. Urmila Rai, S.N.Rai.Business Communication. Himalaya Publishing House,Mumbai.<br>2. Bhardwaj, Amita. Improving Reading Skills. New Delhi: Sarup & Sons, 2004.<br>3. Murphy, R. English Grammar in Use, 4th edition, London: Cambridge University Press.2012. |

|                         |                               | <b>Semester Examination</b>  | <b>30</b>     |

**Course Objectives**

This subject helps to clarify the concepts of data structure which help to enhance programming techniques in procedure oriented language. This subject covers all the techniques of stack, queue, tree and graph theory and its implementation in normal C programming language.

|           |   |
|-----------|---|
| <b>1)</b> | To enhance the advance concepts of an Array with its applications                     |
| <b>2)</b> | To provide the knowledge of basic data structures and their implementations.          |
| <b>3)</b> | To understand importance of data structures in context of writing efficient programs. |
| <b>4)</b> | To develop skills to apply appropriate data structures in problem solving.            |

| <b>Pre Requisite</b> | <b>Basic knowledge of C programming</b>   | <b>Number of Lecture</b> |
|----------------------|---|--------------------------|
| <b>Unit – I</b>      | <b>Introduction To Data Structure :</b> Introduction, Data Definition, Data Object, Data Types, Built-in Data Type, Derived Data Type, Data Structure, Implementation of Data Structure<br><b>Array :</b> Array as Data Structure, Storage Representation of Arrays, Applications of Arrays, Sparse Matrices, Addition of Sparse Matrices, Transpose of a Sparse Matrix | <b>10</b>                |
| <b>Unit – II</b>     | <b>Stack :</b> Introduction, Definition, Operation on Stack, Static & Dynamic Implementation of a Stack, Application of Stack, Recursion, Infix, Prefix & Postfix expression,<br><b>Queue:</b> Introduction, Definition of a Queue, Operation on a Queue, Static & Dynamic Implementation of Queue, Types of Queue, Circular Queue,                                     | <b>10</b>                |

|                                   |   |           |
|-----------------------------------|---|-----------|
|                                   | Priority Queue, DEQueue, Application of Queue, Job Scheduling, Reversing Stack using Queue  |           |
| <b>Unit – III</b>                 | <b>Linked List :</b> Introduction, Drawback of Sequential Storage, Concept of Linked List, Implementation of Linked List, Operation of Linked List, Creating a List, Displaying a List, Inserting an element in the List, Deleting an element, Other Operation & Applications, Types of Linked List Reversing a Linked List, Circular Linked List Concept, Doubly Linked List Concept | <b>10</b> |
| <b>Unit – IV</b>                  | <b>Tree :</b> Tree Terminology, Binary Tree, Binary Tree Representation, Binary Search Tree (BST), Creating a BST, Binary Search Tree Traversal, Preorder Traversal, Inorder Traversal, Postorder Traversal, AVL tree   | <b>10</b> |
| <b>Unit – V</b>                   | <b>Graph :</b> Introduction, Graph Representation, Adjacency Matrix, Adjacency List, Graph Traversals, Depth First Search, Breadth First Search, Applications of Graph  | <b>05</b> |
|                                   | <b>Total Lectures</b>   | <b>45</b> |
| <b>Text Books</b>                 | 3. C & Data Structure Balagurusamy,<br>4. Data Structure through C in depth Shrivastava&Shrivastava ,<br>5. Data Structure through C Y.P. Kanetkar  |           |
| <b>Additional Reference Books</b> | 4. Data Structure Seymour Liptsuz, Data Structure Tannebaum ,<br>5. Data structure and program design in c R.L.Kruse  |           |

|                         |                                      | <b>Semester Examination</b>    | 30     |

### **Course Objectives**

This subject helps to clarify the concepts of data structure which help to enhance programming techniques in procedure oriented language. This subject covers all the techniques of stack, queue, tree and graph theory and its implementation in normal C programming language.

|    |   |
|----|---|
| 1) | To enhance the advance concepts of an Array with its applications                     |
| 2) | To provide the knowledge of basic data structures and their implementations.          |
| 3) | To understand importance of data structures in context of writing efficient programs. |
| 4) | To develop skills to apply appropriate data structures in problem solving.            |

| <b>Pre Requisite</b> | <b>Basic knowledge of C programming</b>  | <b>Number of Lecture</b> |
|----------------------|--|--------------------------|
| <b>Unit – I</b>      | <b>Assignments on Unit -1</b> <ol style="list-style-type: none"> <li>1. Write a program to create single dimension array, enter value and print it</li> <li>2. Write a program to create double dimension array, enter value and print it</li> <li>3. Write a program addition, subtraction &amp; multiplication operations on Single dimension array.</li> <li>4. Write a program addition, subtraction &amp; multiplication operations on double dimension array.</li> <li>5. Write a program for Sparse matrix</li> </ol>   | 10                       |
| <b>Unit – II</b>     | <b>Assignments on Unit -2</b> <ol style="list-style-type: none"> <li>1. Write a program to create a stack and display it in forward &amp; backward direction using an Array</li> <li>2. Write a program to perform PUSH &amp; POP operation and display it using an Array</li> <li>3. Write a program to create a stack and search element in stack using an Array</li> <li>4. Write a program to enter string and print it in reverse manner</li> <li>5. Write a program to create a Queue and display it in forward &amp; backward direction using an Array</li> <li>6. Write a program to create a Queue, Delete Element &amp; display it using an Array.</li> <li>7. Write a program to create a Queue, Add Element &amp; display it using an Array.</li> <li>8. Write a program to create a Queue, display and search element using an Array.</li> <li>9. Write a program to create a Circular Queue</li> </ol> | 10                       |
| <b>Unit – III</b>    | <b>Assignments on Unit -3</b> <ol style="list-style-type: none"> <li>1. Write a program to create a Linked List and Display</li> <li>2. Write a program to create a Linked List, add node at beginning and display it.</li> <li>3. Write a program to create a Linked List, add node at end and display it</li> <li>4. Write a program to create a Linked List, add node at between and display it</li> </ol>  | 10                       |

|                                   |  |           |
|-----------------------------------|--|-----------|
|                                   | <p>5. Write a program to create, delete first element and display it<br/> 6. Write a program to create, delete last element and display it<br/> 7. Write a program to create, delete between element and display it<br/> 8. Write a program to create, display and search element.<br/> 9. Write a program to implement stack using Linked List.<br/> 10. Write a program to implement queue using Linked List.</p>  |           |
| <b>Unit – IV</b>                  | <b>Assignments on Unit -4 ( to be performed in Handbook )</b><br>1. Write Inorder / Preorder / Post order of any tree<br>2. Construct tree using Inorder , Preorder and Postorder<br>3. Representation of algebraic equations in Extended Tree<br>4. Create a Memory allocation for Tree using Adjacency Matrix .<br>5. Create a Memory allocation for Tree using Adjacency List .<br>6. Construct Binary Threaded Tree  | <b>10</b> |
| <b>Unit – V</b>                   | <b>Assignments on Unit - 5 ( to be performed in Handbook )</b><br>1. Write a relation for Directed Type of Graph ( Three Examples)<br>2. Write a relation for Un-directed Type of Graph ( Three Examples)<br>3. Represent given graph using Adjacency Matrix ( Three Examples)<br>4. Represent given graph using Adjacency List( Three Examples)<br>5. Find DFS & BFS for given graph ( Three Examples )<br>6. Find Spanning Tree of given graph ( Three Examples) | <b>05</b> |
|                                   | <b>Total Lectures</b>  | <b>45</b> |
| <b>Text Books</b>                 | 1.C & Data Structure Balagurusamy,<br>2. Data Structure through C in depth Shrivastava&Shrivastava ,<br>3. Data Structure through C Y.P. Kanetkar  |           |

### Course Objectives

|           |  |
|-----------|--|
| <b>1)</b> | To introduce students to the ASP.NET framework, its components, and its role in web development, providing a foundational understanding of web application architecture within the .NET environment. |
| <b>2)</b> | To equip students with the skills to create and manage web forms and utilize various server controls, enabling them to build interactive and user-friendly web applications.                         |
| <b>3)</b> | To develop an understanding of state management techniques and form validation controls, ensuring data integrity and improving the user experience in web applications.                              |
| <b>4)</b> | To provide knowledge on connecting to databases, executing queries, and binding data to server controls, allowing students to integrate and manipulate data within their web applications.           |

| <b>Pre Requisite</b> | <b>Visual Basic</b>  | <b>Number of Lecture</b> |
|----------------------|--|--------------------------|
| <b>Unit – I</b>      | <b>Introduction to ASP.NET</b> <ul style="list-style-type: none"> <li><b>Overview of ASP.NET:</b> <ul style="list-style-type: none"> <li>Introduction to ASP.NET and its features</li> <li>Differences between ASP.NET Web Forms and ASP.NET MVC</li> <li>Understanding the .NET Framework and .NET Core</li> </ul> </li> <li><b>Development Environment:</b> <ul style="list-style-type: none"> <li>Setting up the development environment (Visual Studio)</li> <li>Creating an ASP.NET project</li> <li>Understanding the project structure</li> </ul> </li> </ul> | <b>09</b>                |
| <b>Unit – II</b>     | <b>Web Forms and Server Controls</b> <ul style="list-style-type: none"> <li><b>ASP.NET Web Forms:</b> <ul style="list-style-type: none"> <li>Introduction to Web Forms</li> <li>Page lifecycle</li> <li>Creating and managing Web Forms</li> </ul> </li> <li><b>Server Controls:</b> <ul style="list-style-type: none"> <li>Understanding server controls</li> <li>Standard controls: TextBox, Button, Label, CheckBox, RadioButton, etc.</li> <li>Data controls: GridView, Repeater, DataList</li> </ul> </li> </ul>  | <b>09</b>                |

|                                   |   |           |
|-----------------------------------|---|-----------|
| Unit – III                        | <p><b>State Management and Validation</b></p> <ul style="list-style-type: none"> <li>• <b>State Management:</b> <ul style="list-style-type: none"> <li>◦ ViewState, Session State, Application State</li> <li>◦ Cookies and Query Strings</li> </ul> </li> <li>• <b>Validation Controls:</b> <ul style="list-style-type: none"> <li>◦ Client-side vs. server-side validation</li> <li>◦ RequiredFieldValidator, RangeValidator, RegularExpressionValidator, CustomValidator</li> <li>◦ ValidationSummary control</li> </ul> </li> </ul> | 09        |
| Unit – IV                         | <p><b>Data Access and Binding</b></p> <ul style="list-style-type: none"> <li>• <b>Data Binding:</b> <ul style="list-style-type: none"> <li>◦ Data binding concepts</li> <li>◦ Binding data to controls: GridView, Repeater, DropDownList</li> </ul> </li> </ul>   | 09        |
| Unit – V                          | <p><b>Web Services and Security</b></p> <ul style="list-style-type: none"> <li>□ Authentication and Authorization</li> <li>□ Forms Authentication and Windows Authentication</li> <li>□ Role-based security</li> <li>□ Protecting against common web vulnerabilities (SQL injection, XSS, CSRF)</li> </ul>  | 09        |
|                                   | <b>Total Lectures</b>   | <b>45</b> |
| <b>Text Books</b>                 | <ol style="list-style-type: none"> <li>1. MacDonald, M. (2010). <i>Beginning ASP.NET 4: in C# and VB</i>. Wrox.</li> <li>2. Liberty, J., &amp; Hurwitz, M. (2018). <i>Programming ASP.NET Core</i>. O'Reilly Media.</li> </ol>  |           |

| <b>Subject Title</b>    | <b>ASP.Net-Lab</b> |                                |               |
| <b>Subject Ref. No.</b> | <b>BCA404P</b>     | <b>No. of Credits</b>          | <b>2</b>      |
|                         |                    | <b>No. of Periods / Week</b>   | <b>45 / 3</b> |
|                         |                    | <b>Assignments / Sessional</b> | <b>20</b>     |
|                         |                    | <b>Semester Examination</b>    | <b>30</b>     |

### **Course Objectives**

|           |   |
|-----------|---|
| <b>1)</b> | To familiarize students with the ASP.NET development environment and basic project setup.               |
| <b>2)</b> | To develop skills in creating and managing web forms and handling server controls.                      |
| <b>3)</b> | To understand and implement various state management techniques in ASP.NET                              |
| <b>4)</b> | To gain hands-on experience with database connectivity, data manipulation, and data binding in ASP.NET. |

|                      |                      |   |
|----------------------|----------------------|---|
| <b>Pre Requisite</b> | Visual Basic and SQL | <b>Number of Lecture -</b><br><b>45</b> |
|----------------------|----------------------|---|

### **LAB Assignment**

#### **Setting Up the Development Environment**

- **Practical Exercises:**
  - Installing Visual Studio and necessary components for ASP.NET development.
  - Creating a new ASP.NET Web Application project.
  - Understanding and navigating the project structure.
  - Running the default application and exploring the output.

#### **Creating and Managing Web Forms**

- **Practical Exercises:**
  - Creating a simple web form with various server controls (TextBox, Button, Label).
  - Handling button click events to perform basic operations.
  - Using data controls like GridView and Repeater to display data.
  - Implementing validation controls (RequiredFieldValidator, RangeValidator, etc.) to ensure data integrity.

## State Management Techniques

- **Practical Exercises:**

- Using ViewState to maintain state between postbacks.
- Implementing Session State to store user data across multiple pages.
- Managing Application State for global data storage.
- Using cookies and query strings for state management.

## Data Access and Data Binding

- **Practical Exercises:**

- Connecting to a SQL Server database using ADO.NET.
- Executing SQL queries and displaying results in a GridView control.
- Implementing CRUD operations (Create, Read, Update, Delete) using SqlCommand and SqlDataAdapter.
- Using Entity Framework to perform data operations and binding data to controls like DropDownList and ListBox.

|                         |                                 | <b>Semester Examination</b>  | <b>: 30</b>   |

### Course Outcomes(Cos)

At The end of the course, Students will be able to:

|             |   |
|-------------|---|
| <b>CO-1</b> | <b>Apply the principles python programming.</b>           |
| <b>CO-2</b> | <b>Write clear and Effective python code.</b>             |
| <b>CO-3</b> | <b>Create applications using python programming.</b>      |
| <b>CO-4</b> | <b>Access database using python programming.</b>          |
| <b>CO-5</b> | <b>Develop web applications using python programming.</b> |
| <b>CO-6</b> | <b>Develop and Use web services using python.</b>         |

|                     |   |
|---------------------|---|
| <b>Prerequisite</b> | Working knowledge of c/C++ Programming, Basic algorithms and data structure concepts.   |
| <b>Unit-I</b>       | Introduction to python programming language: Strengths and weaknesses, IDLE, Dynamic types, Naming conventions, String values, String operations, Strings lices, String operators, Numeric data types, Conversions ,Built in functions  |
| <b>Unit-II</b>      | Data Collections And Language Component: Introduction, Control Flow And Syntax, Indenting, The If Statement, Relational Operators, Logical, Operators, True Or False, Bitwise operators, The while loop, Break and continue, The for loop ,Lists, Tuples, Sets, Dictionaries, Sorting dictionaries, Copying collections.  |
| <b>Unit-III</b>     | Object and classes: Classes in python, Principles of object orientation, Creating Classes, Instance methods, File organization special methods, Class variables, Inheritance, Polymorphism, Type identification, Custom exception classes   |
| <b>Unit-IV</b>      | Functions and modules: Introduction, Defining your own functions, Parameters, Function documentation, Keyword and optional parameters, Passing collection sto a Function, Variable Number Of Arguments, Scope ,Functions - "First Class Citizens", Passing Functions To A Function, Mapping Functions In A Dictionary, Lambda, Modules  |
| <b>Unit-V</b>       | I/O And Error Handling In Python : Introduction, Data Streams, Creating Your Own Data Streams, Access Modes, Writing Data To A File, ,Reading Data From A File, Additional File Methods, Using Pipes As Data Streams, Handling IO Exceptions, Working With Directories, Metadata, Errors, Run Time Errors, The Exception Model, Exception Hierarchy, Handling Multiple Exceptions |
| <b>Textbooks</b>    | Learning Python, 4th Edition By Mark Lutz<br>Programming Python, 4th Edition By Mark Lutz   |

|                         |                   |                                |        |
|-------------------------|-------------------|--------------------------------|--------|
| <b>Subject Title</b>    | <b>Python Lab</b> |                                |        |
| <b>Subject Ref. No.</b> | <b>BCA-406P</b>   | <b>No. of Credits</b>          | 2      |
|                         |                   | <b>No. of Periods / Week</b>   | 45 / 3 |
|                         |                   | <b>Assignments / Sessional</b> | 20     |
|                         |                   | <b>Semester Examination</b>    | 30     |

### Course Objectives

|    |   |
|----|---|
| 1) | To be able to introduce core programming basics and various Operators of Python programming language  |
| 2) | To demonstrate about Python data structures like Lists, Tuples, Sets and dictionaries                 |
| 3) | To understand about Functions, Modules and Regular Expressions in Python Programming.                 |
| 4) | To gain hands-on experience with database connectivity, data manipulation, and data binding in Python |

|                      |                                |                               |
|----------------------|--------------------------------|-------------------------------|
| <b>Pre Requisite</b> | Basic knowledge of programming | <b>Number of Lecture - 45</b> |
|----------------------|--------------------------------|-------------------------------|

### LAB Assignment

- 1) WAP in Python for addition of two numbers.
- 2) WAP in Python to print Fibonacci series.
- 3) WAP in Python to find factorial of the given no.
- 4) WAP in Python to find Area of Circle.
- 5) WAP in Python to calculate simple interest.
- 6) WAP in Python to Print all Prime no in an interval.
- 7) WAP in Python to find largest number in an array.
- 8) WAP in Python for rotation of array.
- 9) WAP in Python to interchange first and last element in the list.
- 10) WAP in Python to find the length of list.
- 11) WAP in Python to Swap the elements from list.
- 12) WAP in Python to find sum of squares of first N numbers.
- 13) WAP in Python to find smallest number in the list.
- 14) WAP in Python that accepts the user's first and last name and prints them in reverse order
- 15) WAP in Python that accepts a sequence of comma-separated numbers from the user and generates a list and a tuple of those numbers.

| <b>Additional Reference Books</b> | 1. Think Python, 2 Edition, 2017 Allen Downey, Green Tea Press.<br>2. Introduction to Python, 2015 Kenneth A. Lambert, Cengages.   |  |

**GE/OE : Generic Elective / Open Elective ( Choose any one )**

|                         |                 |                                |               |
|-------------------------|-----------------|--------------------------------|---------------|
| <b>Subject Title</b>    | <b>SPSS</b>     |                                |               |
| <b>Subject Ref. No.</b> | <b>BCA-407T</b> | <b>No. of Credits</b>          | <b>2</b>      |
|                         |                 | <b>No. of Periods / Week</b>   | <b>45 / 3</b> |
|                         |                 | <b>Assignments / Sessional</b> | <b>20</b>     |
|                         |                 | <b>Semester Examination</b>    | <b>30</b>     |

**Course Objectives**

|           |   |
|-----------|---|
| <b>1)</b> | 1) Compute frequency tables for qualitative and quantitative data |
| <b>2)</b> | 2) Represent data graphically                                     |
| <b>3)</b> | 3) Compute descriptive statistics of data                         |
| <b>4)</b> | 4) Compute and interpret basic statistics                         |

**Unit 1: Introduction to SPSS**

SPSS Environment: data editor, output viewer, syntax editor. Entering Data in SPSS, Variable types in SPSS and Defining variables, saving the file, importing data from Excel, recoding of variables, identification of duplicate cases, computation of new variables, addition and deletion of rows/ columns.

**Unit 2: Tabulation of Data**

Computation of Frequencies for different type of data (qualitative, quantitative, continuous and discrete) and scales (nominal, ordinal, interval and ratio scale), binning of data, Finding percentage, customized tables in SPSS.

**Unit 3: Diagrammatic and Graphical representation of data**

Plotting of Simple bar graph, Clustered bar graph, stacked bar graph, pie chart, scatter plot, line graph, histogram. Changing colors, labeling bars/ slices by counts/ percentage.

**Unit 4: Measures of central tendency and dispersion using SPSS**

Computation of mean, mode, median, minimum, maximum, range, quartiles, percentiles, skewness, kurtosis, variance, standard deviation.

**Unit 5: Basic Statistics using SPSS**

Sorting of data in ascending and descending order, finding ranks. Computation of simple correlation coefficient, spearman's rank correlation. Generating random numbers/ random sample using SPSS. Cross tables in SPSS and Chi square test for independence.

**Text Books:**

1. HOW TO USE SPSS ® A Step-By-Step Guide to Analysis and Interpretation, Brian C. Cronk, Tenth edition published in 2018 by Routledge.

2. SPSS for Intermediate Statistics: Use and Interpretation, Nancy L. Leech et. al., Second edition published in 2005 by Lawrence Erlbaum Associates, Inc.

3. Using IBM SPSS statistics for research methods and social science statistics, William E. Wagner, Fifth edition published in 2015 by SAGE Publications, Inc.

### Course Outcomes (CO):

| CO# | Cognitive Abilities | Course Outcomes   |
|-----|---------------------|---|
| CO1 |                     | Understand the basics of creativity and innovation in technology.                     |
| CO2 |                     | Apply mind mapping and creative techniques to solve real-world problems.              |
| CO3 |                     | Create - Use the SCAMPER technique to develop innovative ideas and solutions.         |
| CO4 |                     | Communicate - Present creative ideas effectively using storytelling and visual tools. |

|   |
|---|
| <b>Unit 1: Foundations of Creativity and Innovation</b>   |
| <ul style="list-style-type: none"> <li><b>Introduction to Creativity:</b> Definition, importance, and role in technology problem-solving.</li> <li><b>Creativity vs. Innovation:</b> How creative thinking leads to innovation in tech.</li> <li><b>The Creative Process:</b> Stages of creativity – from idea generation to implementation.</li> <li><b>Barriers to Creativity:</b> How to overcome mental blocks and traditional thinking.</li> </ul> <p><b>Hands-on Activity:</b> Brainstorm ideas to redesign a basic mobile app or website and create a creative solution.</p> |
| <b>Unit 2: Mind Mapping and Creative Thinking Techniques</b>  |
| <ul style="list-style-type: none"> <li><b>Introduction to Mind Mapping:</b> Basics of mind mapping, its benefits, and how it helps with idea generation.</li> <li><b>Mind Mapping for Problem Solving:</b> Using mind maps to break down complex tech issues into manageable parts.</li> <li><b>Collaborative Mind Mapping:</b> How teams can use mind mapping as a creative and collaborative tool for projects.</li> </ul> <p><b>Hands-on Activity:</b> Create a mind map for a technology startup idea, visually breaking down the components needed to launch it.</p>           |
| <b>Unit 3: SCAMPER Technique for Innovation</b>   |
| <ul style="list-style-type: none"> <li><b>Introduction to SCAMPER:</b> Understanding SCAMPER (Substitute, Combine, Adapt, Modify, Put to another use, Eliminate, Rearrange) as a creativity tool.</li> <li><b>Using SCAMPER for Product Improvement:</b> Applying SCAMPER to improve existing products or services.</li> <li><b>Team SCAMPER Exercise:</b> Working in groups to apply SCAMPER to a real-world business or tech problem.</li> </ul>  |
| <b>Suggested Readings:</b>  |
| <ol style="list-style-type: none"> <li>1. <b>Buzan, T.</b> – <i>The Mind Map Book</i> (BBC Active)</li> <li>2. <b>Kelley, T. &amp; Littman, J.</b> – <i>The Art of Innovation</i> (Crown Business)</li> <li>3. <b>Brown, T.</b> – <i>Change by Design</i> (HarperBusiness)</li> </ol>   |

### **Course Objectives**

|    |  |
|----|--|
| 1) | To develop skills in students that can help them plan, implement, and monitor cyber security mechanisms to ensure the protection of information technology assets. |
| 2) | To explain about the various facets of cyber crimes  |
| 3) | To understand the fundamentals of Cryptography   |
| 4) | Knowledge and implementation of Cyber Laws   |

| <b>Pre Requisite</b> |   | <b>Number of Lecture - 45</b> |
|----------------------|---|-------------------------------|
| <b>Unit – I</b>      | <b>Introduction To Cyber Security-</b><br>Importance of cyber security, Advantages and Disadvantages, computer security, Cyber Security Basic Terminology, CIA, Digital Piracy, Types of Security-Network Security, Cloud Security, Endpoint Security, Mobile Security, IOT Security, Application Security, Zero Trust, Cyber-attack-types of cyber-attack.                   | <b>10</b>                     |
| <b>Unit – II</b>     | <b>Social Media Overview and Security-</b><br>Introduction to Social media, Types of Social media, Hashtag, Viral content, Social media marketing, Social media privacy, hacking- types of hackers, unknown links, Social Media Case Studies - Facebook, Twitter, Instagram, YouTube, LinkedIn.   | <b>08</b>                     |
| <b>Unit – III</b>    | <b>Cyber-crime and Cyber laws –</b><br>Introduction to cyber-crime, Classification of cybercrimes, Type of Cyber Crime-Identity Theft, Cyber Bullying, Cyber Stalking, Cyber Harassment, Cyber Terrorism, Plagiarism and , Child Pornography, introducing cyber law, Scope of Cyber laws, IT Act 2000 and 2008, IPC,Legal perspective of cybercrime, Cybercrime and offences, | <b>10</b>                     |
| <b>Unit – IV</b>     | <b>Cryptography-</b> Definitions, types of Cryptography Classical encryption techniques, One time pad, Perfect Secrecy, DES, Triple DES, Finite fields, AES, Modes of Encryption, Asymmetric Cryptography, symmetric  | <b>10</b>                     |

|                                   |   |                       |
|-----------------------------------|---|-----------------------|
|                                   | Cryptography, Hash function, public , Digital signature   |                       |
| <b>Unit – V</b>                   | <b>Awareness and Training</b> - identify the fake software, website, application, Mail and APK Files, Online compliant process, suggestion, Dos & Don'ts- Email, Password, computer, laptop, Wireless Connectivity, Portable Media, Security from Virus & malicious Code, Social Networking, Internet Usage.  | <b>07</b>             |
|                                   |   | <b>Total Lectures</b> |
| <b>Text Books</b>                 | <ol style="list-style-type: none"> <li>1. Introduction to Cyber Security: Guide to the World of Cyber Security, 2021 Anand shinde.</li> <li>2. Cyber Laws: Intellectual Property &amp; E-Commerce Security by Kumar K, Dominant Publishers.</li> <li>3. Network Security Bible, Eric Cole, Ronald Krutz, James W. Conley, 2nd Edition, Wiley India Pvt. Ltd.</li> <li>4. B. Forouzan, D. Mukhopadhyay, "Cryptography and Network Security 2/e", TataMcGraw Hill</li> </ol>  |                       |

### Course Objectives

|           |   |
|-----------|---|
| <b>1)</b> | Learn challenges in social media related to privacy and security  |
| <b>2)</b> | To expose students to responsible use of online social media networks.  |
| <b>3)</b> | To equip students with the technical knowledge and skills needed to protect and defend against cyber threats. |
| <b>4)</b> | Take measures for self-cyber-protection as well as societal cyber-protection.                                 |

| <b>Pre Requisite</b> | <b>LAB Assignment</b>  | <b>Number of Lecture - 45</b> |
|----------------------|--|-------------------------------|
| <b>1</b>             | Reporting phishing emails.   |                               |
| <b>2</b>             | Demonstration of email phishing attack and preventive measures.  |                               |
| <b>3</b>             | Basic checklist, privacy and security settings for popular Social media platforms.                               |                               |
| <b>4</b>             | Reporting and redressed mechanism for violations and misuse of Social media platforms.                           |                               |
| <b>5</b>             | Configuring security settings in Mobile Wallets and UPIs.  |                               |
| <b>6</b>             | Checklist for secure net banking.  |                               |
| <b>7</b>             | Setting, configuring and managing three password policy in the computer (BIOS, Administrator and Standard User). |                               |
| <b>8</b>             | Setting and configuring two factor authentication in the Mobile phone.   |                               |
| <b>9</b>             | Security patch management and updates in Computer and Mobiles.   |                               |
| <b>10</b>            | Managing Application permissions in Mobile phone.  |                               |
| <b>11</b>            | Installation and configuration of computer Anti-virus.   |                               |
| <b>12</b>            | Installation and configuration of Computer Host Firewall.  |                               |
| <b>13</b>            | Wi-Fi security management in computer and mobile.  |                               |
| <b>14</b>            | Checklist for reporting cybercrime at Cybercrime Police Station.   |                               |
| <b>15</b>            | Checklist for reporting cybercrime online.   |                               |

## SEC : Skill Enhancement Course ( Choose any one )

|   |   |                         |       |
|---|---|-------------------------|-------|
| Subject Title   | Quantitative Aptitude   |                         |       |
| Subject Ref. No.  | BCA-409T  | No.of Credits:          | 2     |
|   |   | No. of Periods / Week:  | 45/03 |
|   |   | Assignments /Sessional: | 20    |
|   |   | Semester Examination:   | 30    |
| <b>Course Objectives</b>  |   |                         |       |
| <p>The primary goal of introducing "Quantitative Aptitude" for mathematics students is to help them develop the skills they need to pass competitive tests and get better jobs. To inspire confidence in students, efforts have been made to incorporate essential mathematical principles. Enrich their understanding and develop their logical reasoning thinking skills.</p> |   |                         |       |
| <b>Course Outcomes(COs)</b>   |   |                         |       |
| <p>At the end of the course, students will be able to</p>   |   |                         |       |
| CO-1  | Enhance Problem Solving Skill   |                         |       |
| CO-2  | Improve Verbal & Non-verbal ability skill   |                         |       |
| CO-3  | Use their logical thinking and analytical abilities to solve reasoning questions  |                         |       |
| CO-4  | Prepare for various public and private sector exams & placement drives.   |                         |       |
| PreRequisite  | <p>Basic Mathematics , reasoning skill</p>  |                         |       |
| Unit-I  | <p>Average &amp; Number Aptitude, Compound Interest, Age, Calendar, Clocks, Height &amp; Distance, Percent, Profit and Loss , Speed time &amp; Distance, Simple Interest , problems on Train, Time &amp; Work, Surds &amp; Indices , HCF &amp; LCM, Area Aptitude, Ration &amp; Proportion , Area Aptitude , Decimal Fraction, Simplification</p> |                         |       |
| Unit-II   | <p>Logarithm , Square Roots &amp; Cube Roots, Odd man out from series , Algebraic Equations , Probability &amp; Combinations</p>  |                         |       |
| Unit-III  | <p>Logical Reasoning : Verbal : Number Series, Letter Series, Analogies, Cause &amp; Effect, Verbal Classification, Blood relations, Logical Sequence of words, Direction Sense Test, Logical Venn Diagram</p>  |                         |       |

| <b>Subject Title</b>    | <b>Business Communication</b> |                                 |              |
| <b>Subject Ref. No.</b> | <b>BCA-409T</b>               | <b>No. of Credits:</b>          | <b>2</b>     |
|                         |                               | <b>No. of Periods / Week:</b>   | <b>45/03</b> |
|                         |                               | <b>Assignments / Sessional:</b> | <b>20</b>    |
|                         |                               | <b>Semester Examination:</b>    | <b>30</b>    |

**Course Objectives (COs)**

|    |   |
|----|---|
| 1) | To train students to enhance written as well as oral communication in the corporate world |
| 2) | To help students in understanding the principles and techniques of business communication |
| 3) | To understand the use of electronic media for communication                               |

**Course Outcomes (COs)**

At the end of the course, students will be able to:

|    |   |
|----|---|
| 1) | Explain the need for communication in management                                  |
| 2) | Appreciate the need of effective writing for communication.                       |
| 3) | Demonstrate the skill of effective report writing and summarizing annual reports. |
| 4) | Analyze business correspondence and e-correspondence.                             |
| 5) | Able to appreciate oral presentations   |

| <b>Pre Requisite</b> | <b>Number of Lecture</b> |

## AEC : Ability Enhancement Course

|                  |            |                         |    |
|------------------|------------|-------------------------|----|
| Subject Title    | English-IV |                         |    |
| Subject Ref. No. | BCA410T    | No. of Credits          | 3  |
|                  |            | No. of Periods / Week   | 3  |
|                  |            | Total periods           | 45 |
|                  |            | Assignments / Sessional | 20 |
|                  |            | Semester Examination    | 30 |

### Course Objectives

|    |  |
|----|--|
| 1) | To make students appreciate the importance of signs and symbols in communication and enable students to understand the process of communication                                      |
| 2) | To highlight the importance of proficiency in speaking a language in different domains. To help students differentiate among the various domains on the basis of language.           |
| 3) | Familiarize learners with the importance of listening skills • Provide an overview of different types of listening skills • Introduce some useful strategies for effective listening |
| 4) | To build upon students' Grammatical command on English Language for enhancement of their receptive and productive skills.  |

### Course Outcomes (COs)

At the end of the course, students will be able to:

|      |  |
|------|--|
| CO-1 | The students are expected to realize their conscious and unconscious mistakes and apply these strategies to know how to be effective listener in their day-to-day life   |
| CO-2 | To describe different types methods of communication to learners.  |
| CO-3 | Upon completion of the course the students are able to identify different types of listening and reading. They can use each listening and reading type based on their need and context.  |
| CO-4 | The students would be able to use their applied knowledge in various fields.   |
| CO-5 | The Learner's Community would be able to write text in an appropriate style, write Complex reports, letters and present a case with an effective logical structure and review any professional or literary work of art, develop knowledge about computer assisted language learning and its application. |

| Pre Requisite     |   | Number of Lectures |
|-------------------|---|--------------------|
| <b>Unit – I</b>   | <b>The Communication Process</b><br>Introduction, Objectives, The Communication Process, Definitions, Signs and Symbols, The Process of Communication, Models of Communication, Principles of Communication   | 10                 |
| <b>Unit – II</b>  | <b>Methods of Communication</b><br>Verbal communication, Oral communication, written communication, Body language, Graphics.  | 10                 |
| <b>Unit – III</b> | <b>Channel of Communication</b><br>External, Outward and Inward, Internal, Formal channels, vertical, Horizontal, Consensus, Informal channel, Grapevine  | 10                 |
